## Case Study: Bank Farm Winery

### Project scope

Fully integrated Lutron Lighting control system

Control4 system combining AV, lighting and heating controls

Portable AV system – projector and wireless presentation solution

Integrated Audio system

### Client brief

Bank farm winery produces their own high-end English Sparkling wines and offers guests the chance to taste and enjoy their wines in a stylish and luxurious private setting. Chris Lewis Smart Home was asked to:

- Install a Lutron lighting system for the entire building which would provide intuitive lighting scenes.
- Integrate heating and lighting so they could be controlled from one device.
- Provide a portable presentation solution - comprising of a projector

and wireless AV system for the conference area.

- Install a high-quality audio system for the winery.

### Client Comment

“ The smart systems installed by Chris Lewis make a big difference, the control I have of the Winery makes the most of the great facilities we have here. The Chris Lewis team went the extra mile, meeting me after installation to

understand how I wanted to use our meeting spaces and put forward some great ideas to make them as easy to use as possible. ”
